

Book & DVD

Book

This fully illustrated manual chronicles the building of one of my classical guitars from a stack of boards to putting on the strings and tuning it up. The book is intended for those attempting to build their first guitar, but contains material that may be beneficial to anyone with some guitar building experience.

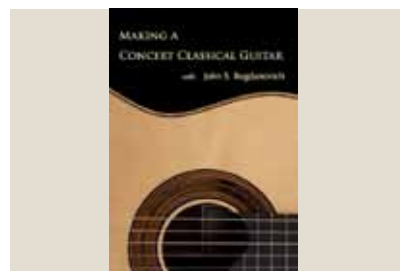

price: \$30.00 each (hardcover signed copy)

DVD

This video DVD series documents the construction of a concert quality classical guitar. The guitar design is new, and new techniques are presented to meet the challenge. A complete set of full size color drawings and acetates for the guitar, as well as many of the jigs and fixtures used in throughout the video are included.

price: \$229.99

Book & DVD Set

Both the book and the DVD demonstrate with amazing clarity and detail the construction of a concert classical guitar from beginning to end. Different guitar designs and techniques in each.

price: \$244.99 per set

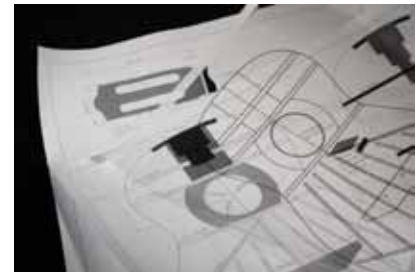

Plans and Templates

Plans & Acetates

The plans consist of two (2) 24"x48" sheets and an acetate used to lay out the sound board bracing as demonstrated in the book. The set of plans are full scale and contain content not included in the book. Plans available in 650 and 640mm scale lengths.

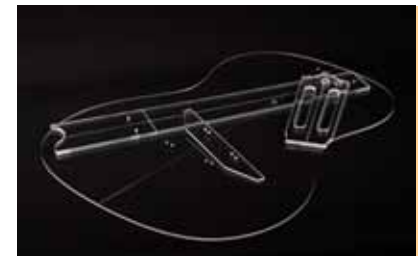

price: \$35.95 ea.

Template Set

The template set consists of a plantilla, headpiece, fingerboard, and bridge patch template. The entire set is made of clear acrylic. The headpiece and fingerboard templates are 1/4" thick and may be also used as a router template. Templates available in 650 and 640mm scale lengths.

price: \$89.95 per set

Molds

Side Mold

The side mold is made of MDF and has been cut on a CNC machine for ultimate accuracy. The side mold is used to laminate sides and may also be used to install linings. Only available in 650mm scale length.

price: \$69.95 each

Lining Mold

The lining mold is made of MDF and has been cut on a CNC machine. It is used to laminate linings as demonstrated in the book. The upper and lower bout are spayed out slightly to offset the tendency of the linings to curl inward. Only available in 650mm scale length.

price: \$59.95 each

Side and Lining Mold Set

The side and lining mold set includes both a side and lining mold at a discounted price. The set of molds are described individually above. Only available in 650mm scale length.

price: \$116.91 per set - 10% savings

Fixtures

Solera

The solera kit allows you to begin working right along with the DVD. The solera substrate is capped with maple veneer on both top and bottom surfaces. Soft carving wood for the lower and upper bout are provided along with assembled rims and hardware necessary to attach removable rims.

price: \$299.95 each

Solera Rims

The solera rims come pre-assembled and pre-drilled. Each rim is composed of three pieces of 3/4" MDF which have been cut on a CNC machine for ultimate accuracy. The rims have been cut to allow for a 4" wide opening at the neck on the solera.

price: \$79.95 each

Sets

DVD, Templates & Molds Set

This set includes DVD box set, the complete template set, and mold set as described above. Drawings are included on disc. The set is offered at a discounted price for savings. Available only in 650 mm scale length.

price: \$404.86 per set - a 10% savings

Plans, Acetate, and Template Set

This set includes the plans and acetate, and complete template set as described above. The set is offered at a discounted price for savings. Available in both 650 and 640mm scale lengths.

price: \$113.31 per set - a 10% savings

Templates & Molds Set

This set contains the templates and mold set. Made on a CNC machine the accuracy of these items far exceeds making these by hand and will make creating these parts and assembly much easier. This set is only available in 650mm scale length.

price: \$197.86 per set - a 10% savings

Tools

Adjustable Tuner Machine Drilling Jig

This jig is designed to drill 13/32" tuning machine roller holes for tuning machines that have their rollers on 35mm centers. The jig is fully adjustable and can be made to accommodate any headpiece veneer stack. Jig is made of solid maple.

price: \$49.95 each

Adjustable Tuning Machine Drilling Jig

The Circle cutting router attachment is made of clear acrylic and will fit any laminate trimming router. The attachment is fully adjustable, and will accommodate almost any size rosette or sound hole.

price: \$32.95 each

Fret Leveling Kit

The fret leveling kit is composed of a pear-wood sanding block shaped to fit frets, and a 3" and 2" solid steel 3/8" diameter dowel. The dowels are used to check for flatness across three frets. A clicking sound when rocked back and forth will indicate a high fret.

price: \$15.95 each

Wood

Side Laminations

Side laminations are now available in three different types of wood., Alaskan yellow cedar, cypress, and pearwood. The set includes 4 laminations 32" long approximately 4" wide and .6mm (.022") thick. Veneer in such small quantities is often difficult if not impossible to obtain commercially.

price: \$12.99 per set, pearwood **price:** 24.99

Lining Laminations

The lining laminations are 4 sheets of mahogany each being 3" wide and between .040 - .045" thick. Mahogany cannot be purchased in these thickness therefore it is necessary to resaw from larger stock. If you do not have milling equipment these laminations will make it possible to make linings as described in the book.

price: \$24.99 per set

Ebonized Pearwood Veneer

Without a doubt ebonized pearwood veneer is the best solution for black veneer used in rosettes, purflings, back and butt strips. The wood is dyed black throughout while possessing all the fine characteristics of pearwood. This wood planes easily in any direction leaving a silky smooth surface unlike dyed poplar and other substitutes. Sheets are 32" long approximately 7" wide and .6mm (.022") thick.

price: 16.99 per sheet
